DEPARTMENT OF SOFTWARE ENGINEERING

ABOUT DEPARTMENT OF SOFTWARE ENGINEERING, NEDUET

The Department of Software Engineering at the NED University takes pride in advancing the software engineering field and maintaining the status of being the highest merit department. The department offers a comprehensive array of educational programs, including undergraduate studies in Software Engineering, a Master of Engineering program in Software Engineering, and a PhD program in Software Engineering. The department's primary objectives hinges around inculcating tech education and undertaking cutting-edge research across various domains such as artificial intelligence, blockchain, data analytics, etc.

The tech curricula taught at the campus not only imparts comprehensive knowledge in terms of tools and techniques for technological advancement but also equip students with the skill set to construct and rigorously test proficient software using state-of-the-art technologies. This comprehensive approach prepares our students for emerging fields, opening doors to diverse career opportunities in development and research, as well as for further academic pursuits. Also, we continually seek solutions to real-world challenges.

Our distinguished faculty, alongside contributing to program excellence and professional development, are unwaveringly committed to continual education and pioneering research. The department regularly evaluates the progress of students, faculty, and programs, ensuring that our core mission remains aligned with the growing tech challenges.

The IT industry's robust growth continues to drive demand for software engineering graduates, offering promising prospects for the graduates equipped with high-quality skill sets across diverse industry.

MESSAGE FROM NEDUET LEADERSHIP

At NED University, this directory marks a significant milestone, documenting the transformation of our students into distinguished alumni. As an institution, we proudly showcase the significant achievements of our former graduates, occupying lead positions in industry and academia across the globe. They have emerged as catalysts for change and educational trailblazers, a testament to the exceptional quality of education we offer.

We believe the fresh graduates will follow the footsteps of their predecessor and achieve excellence in their professional careers. Their unwavering commitment to academic excellence and dedication to lifelong learning make them exceptional candidates for your organization, by adding value and a robust work ethic to the organization.

Collectively, these graduates embody the values and capabilities instilled at the NED University. We are pleased to introduce our accomplished alumni to your organization, and are confident that they will make meaningful and substantial contributions and enrich the organization.

In addition to celebrating the achievements of our graduates, we would also like to take a moment to pay homage to one of our own, a student who, tragically, passed away during the course of his studies – Nizam Ali. Though his journey was cut short, Nizam left an indelible mark on those who knew him. He exhibited remarkable determination, a thirst for knowledge, and a warm spirit that endeared him to both faculty and fellow students. While his physical presence may no longer be with us, his memory and the impact he made will remain forever.

LATE NIZAM ALI

Nizam, a promising student of our department, whose dreams were tragically cut short on 17th February, 2023 at age of 21, will forever be remembered for his passion for learning, unwavering dedication, and warm-hearted spirit. His memory will continue to be a beacon of inspiration for those pursuing knowledge, reminding us that the pursuit of learning is a journey to be embraced, regardless of the obstacles encountered.

PROJECTS

CMMS SaaS Implementation (FYDP)

ReactJS | Material UI 5 | .NET Core| SQL Server

The TITAN – CMMS (Computerized Maintenance Management System) is a web application designed to optimize the management of deferred maintenance and capital improvement activities In this project, I responsible for the front-end

Youtube Clone

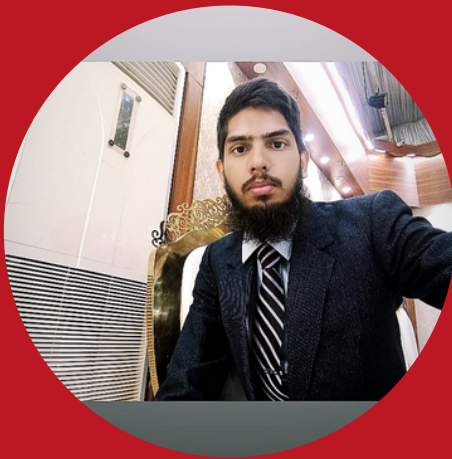

ReactJS | Material UI 5 | RapidAPI | Netlify | GitHub

A responsive ReactJS app with attractive video sections, unique categories, channel pages, and, most crucially, the ability to stream videos directly from App.

Pharmacy management system

C# | MS Access

Single-handedly developed an inventory management system to track sale and purchase of pharmaceutical products

ABDUL REHMAN

SOFTWARE ENGINEER

Hello, I'm Abdul Rehman, a recent software engineering graduate. My passion lies in continually expanding my skillset and staying up-to-date with the latest technologies. I'm eager to jumpstart my career with a forward-thinking company that prioritizes growth, where I can contribute meaningfully and advance my professional journey.

EXPERIENCE

SEP 2023 - PRESENT **Trainee Software Engineer at Virtuosoft**

Polishing my skills by working under supervision of professionals on real projects.

JUNE 2022 - AUG 2022 **MERN Intern At Codup**

Developed a Human Resource Management web app using React.js and Node.js/Express.js.

Collaborated with frontend and backend developers to deliver a seamless web application.

React Native

EXPERIENCE

SEP 2022 -
PRESENT

AlgoRack

- Build pixel perfect UI components in Next Js using Material UI as a front-end library.
- Debugging and bug fixing.
- Implemented APIs and did state management using redux tool kit

PROJECT

AGRO-CHAIN

- A web based portal which provides supply chain services to agricultural exporters of Pakistan.
- Primary objective of the project is to provide a better replacement for the current Agri-Food supply chain models with a solution which allows for a scalable and auditable system.
- The system maintains a record of transactions over the Blockchain network for authenticity and audit.
- Technologies: MERN Stack, Solidity, Sepolia Test Network.

EDUCATION

2019 - 2023

Solidity - Web 3.0

OOP - Design Pattern

EXPERIENCE

OCT 2021 - AUG 2023

Software Engineer at HashPotato

Providing services of developing Full Stack Web and Mobile Applications based on MERN, React Native and Web3.0

SEP 2022 - SEP 2022

Developer Virtual Experience Program at Accenture

Successfully completed assigned tasks during all phases of SDLC

JAN 2022 - JAN 2022

Virtual Solutions Architect Intern at Forage AWS

Concluded my tenure, experiencing the core services of Amazon Web Services

EDUCATION

2019 - 2023

NED University Karachi

Bachelor in Software Engineering

PROJECTS

NED-Express

MERN Stack | React Native | Firebase | CRON Jobs
Comprises of comprehensive Admin Panel and two React Native Applications for FYDP

Autos ERP

C# | WinForms | Azure SQL
An Intermediate scale Desktop ERP in connection with cloud Database, developed for a Retailer site

Plant Disease Detection App

React Native | Flask | ML Model | MongoDB
Python Backend and ML Model integrated with React Native App

WestView Learning Management System

React.js | Node.js | MongoDB | Jitsi Meet
Consolidated online learning platform for Students and Teachers.

ACHIEVEMENTS

Highest Funded Final Year Project by NGIRI & NEDAASC

ALISHBA ARSHAD

SOFTWARE ENGINEER | DATA ANALYST

An aspiring software engineer, driven by an unwavering enthusiasm to create engaging digital experiences. Proficient in crafting projects using MERN stack with a solid foundation in data structures and databases. My expertise extends to deriving strategic data insights and conducting thorough analysis, along with creating Power BI dashboards and reports from customer data.

EXPERIENCE

SEPT 2022 - OCT 2022

Data Analyst Intern at Virtuosoftware

Executed meticulous data cleaning, formatting, and migrations, and creating Power BI dashboard and reports using DAX expressions.

JUNE 2022 - AUG 2022

Summer Web Intern at Folio3

Engaged in various facets of web development, commencing with requirements gathering and progressing through prototyping, wireframing, and the development of a feature-rich application. using MERN stack

APRIL 2022

Intern at Karachi Development Authority

Gained proficiency in Oracle Forms and acquired insights into database organization within professional settings.

EDUCATION

2019 - 2023
University

NED University

BE Software Engineering | CGPA 3.8

PROJECTS

DakterSaab App

Development of a ML based recommendation System for Blood Banks, Clinics, Doctors, and Pharmacies, resulting in a 30% improvement in patient outcomes and a 20% reduction in wait times. This project also included a user-friendly interface with features like appointment reminders, route suggestions, and customizable alerts. Additionally, a web application component was designed for healthcare facilities, streamlining operations for pharmacies, blood banks, doctors, and clinics.

CCTV Cameras Dashboard and Reports

Development of dashboard for NED University's CCTV camera network, offering real-time insights into camera performance, incident resolutions, and operational efficiency. Conducted data cleaning and formatting, I transformed complex data streams into visually engaging insights.

DATA ANALYST

I am a Software Engineering graduate with a strong passion for data analysis. My experience includes several data analysis projects where I've demonstrated the ability to extract insights from complex datasets, apply statistical methodologies, and communicate findings effectively. I am eager to contribute my analytical skills to drive data-driven decision-making and innovation.

PROJECTS - [GITHUB LINK](#)

When Was the Golden Age of Video Games? - **DataCamp**

Analyzing American Baby Name Trends - **DataCamp**

Analyzing Students' Mental Health in SQL - **DataCamp**

Analyze International Debt Statistics - **DataCamp**

BUSHRA ASIF

SOFTWARE ENGINEER

Seeking an entry-level opportunity with an esteemed organization where I can utilize my skills and enhance learning in the field of Software Engineering. An ambitious problem solver and with enthusiastic ability who would like to join the team of like minded developer and learn many more with them.

EXPERIENCE

06-2023 - 08-2023

**Node.js Intern at
Cloud Junction Advisors Inc.**

Worked on Node.js and Typescript to integrate Salesforce with other 3rd party Softwares Like ERP or CRM.

02-2023 - 05-2023

SQA Intern

Worked with Software Project Management tools Like JIRA & Trello to track issues, manage projects, and automate workflows.

08-2022 - 01-2023

**PHP/ Laravel Developer Intern at
Digitech Infra Associates**

Design and implement web applications that use the Laravel framework. Design and maintain databases and Integrating of APIs with server side

07-2021 - 09-2021

**Frontend Developer Intern at
Digitech Infra Associates**

Create quality mockups and prototypes Worked as a Frontend Developer having knowledge in Html, CSS, JavaScript, jQuery and Bootstrap

DARAKHSHAN

WEB DEVELOPER | SOFTWARE ENGINEER

A passionate software engineer with a solid grounding in web development, backend APIs, databases, and front-end and backend technologies.

EXPERIENCE

Ejaarat Labs

JUN 22 - JUL 22

Software Engineer Intern

Khaal Collection System
MySQL | Node.js | React | Redux

Completed various modules i.e update khaal record, khaal count and generate CSV files

AUG 22 - JUN 23

Junior Software Engineer

Askari Online LMS
PostgreSQL | Typescript | React | Redux

- Integrate Zoom API for teachers.
- Developed student and teachers enrollment features

Ticket Management System
PostgreSQL | Node.js | React | Redux
Developed Admin portal (frontend and backend)

PROJECTS

Cloud3- A Secure Decentralized Cloud Storage

FYDP

MySQL | Node.js | React | Tailwind CSS

A web based platform using which user can upload his documents in encrypted form on the IPFS. It gives user a complete control over his document and maintains his data privacy.

ProProgrammers Website

HTML | CSS | Javascript | jQuery | PHP

A complete responsive online website deployed on azure for programmers to learn and practice programming.

The Attire

REACT | MATERIAL UI

A responsive E-commerce website.

FARIYA KHAN

SOFTWARE ENGINEER

Hi there, I am Fariya Khan. As a determined software engineering student, my primary focus is on continuously learning new technologies and skills. I am highly motivated to join a forward-thinking firm that prioritizes growth, where I can make valuable contributions while advancing my career development.

EXPERIENCE

SEPT 21 - OCT 21

IT Intern at SSGCL

Learned the Oracle ERP system, and the modules which SSGC has implemented. Maintenance of SSGC website and an understanding of daily database operations for data management.

JUN 22 - AUG 22

Software Intern at Folio3

Developed skills in web development, specifically in React and Redux, while also learning QA testing techniques, building wireframes and UML diagrams

SEPT 22 - OCT 22

Data Science Intern at PCSIR

Developed a Retinal Vessel Segmentation model and a Diabetic Retinopathy Classification model using TensorFlow achieving 97%, 85% accuracy respectively.

EDUCATION

2019 - 2023
University

NED University of Engineering & Technology

Bachelor of Engineering in Software Engineering | CGPA: 3.74

2017 - 2019
College

BAMM PECHS Govt College for Women

Pre-Engineering | A-One Grade

PROJECTS

Dakter Saab ~ A Healthcare App | FYP

Developed a user-friendly mobile app (React Native) and web-based platform (React.js, Node.js, Express.js, MongoDB) that streamline the search for doctors, blood banks, and pharmacies for patients, along with providing sophisticated search capabilities and location-based functionalities to enhance user satisfaction and minimize waiting times in queues.

Pixbay

Image transformation web app based on Computer Vision
Developed a software that uses Python's Digital Library tools to colorize, blur, and transform images in various styles

interiAR

Augmented Reality Mobile App Flutter, Dart, and AR Core were used to create a virtual furniture store where customers could view the furniture before buying it using their cameras.

FARZEEN ZEHRA

WEB DEVELOPER | SOFTWARE ENGINEER

Enthusiastic software engineer with a strong foundation in web development. Proficient in designing databases, web applications, and APIs. Also adept at innovative problem-solving.

EXPERIENCE

SEP 2022 - NOV 2022 Junior Web Developer at XperLabs

- Developed player profile management system using Firebase backend and React frontend.
- Designed and implemented backend APIs using NodeJS and MySQL for a matrimonial app, streamlining user data management.

MAR 2022 Software Developer at EAK Library, NED University of Engineering & Technology

- Transitioned NED Library System from paid Syndetics API to Google Books API, Open Library API, and Library server's file system.
- Successfully eliminated subscription costs while maintaining robust data availability

SEP 2021 - OCT 2021 Software Development Intern at National Center for Cyber Security (NCCS)

- Developed diverse plug-ins during my NCCS internship to extract and display data from Instagram's and WhatsApp's mobile phone databases within Autopsy, a leading open-source digital forensics software.

EDUCATION

2019 - 2023	NED University of Engineering & Technology
University	BE Software Engineering, CGPA = 3.943
2018-2019	St. Lawrence G.G.D College
Intermediate	Pre-Engineering (88.64%)

PROJECTS

Cloud3 - A Secure Decentralized Cloud Storage | FYP

Cloud3 leverages blockchain, IPFS, and client-side encryption to create a secure and decentralized file storage solution. It employs advanced technologies like Web3, Solidity, and React to build a user-friendly ecosystem. Additionally, a specially built Cloud3-KMS browser extension allows users to manage their keys locally on their computer.

KDKclever Ecommerce App

Developed a mobile e-commerce application using React Native (Expo-managed) and Firebase. Also, created an efficient admin panel with Next.js for streamlined product and order management

Criminal Record Management System (CRMS)

Developed a web application with Node.js, Express.js, EJS, and MySQL, providing remote access to criminal records and integrating real-time facial recognition using a custom Python Flask API for precise suspect identification.

FASIH UR REHMAN ANSARI

SOFTWARE ENGINEER | MERN STACK DEVELOPER

I'm Fasih Ur Rehman Ansari, a dedicated software engineer with a Bachelor's degree in Software Engineering earned from NED University. My professional focus and passion lie in MERN stack development, a technology stack encompassing MongoDB, Express.js, React.js, and Node.js. This stack allows me to create dynamic and responsive web applications with ease.

EXPERIENCE

**SEPTEMBER 2022 -
NOVEMBER 2022**

**Data Science Intern at Pakistan
Council of Scientific & Industrial
Research Laboratories**

Achieved 97% accuracy with Retinal Vessel Segmentation, led a 90% team, and built an 85% Diabetic Retinopathy Classification model. Optimized efficiency from 60% to 80% through preprocessing, integrated into React Native, and developed MERN stack apps collaboratively.

**SEPTEMBER 2021 -
NOVEMBER 2021**

**IT Intern Sui Southern Gas Company
Limited**

I gained comprehensive knowledge of the Oracle ERP system and its modules during my time at SSGC. I analyzed workflow processes across six different departments, worked on website development and maintenance, and honed my database operations and data management skills, providing a well-rounded skill set for the technology and business sectors.

EDUCATION

**2019 - 2023

FIZA SAIF

SOFTWARE ENGINEER

A dedicated software engineer with a strong background in coding and software development. My journey in the field has equipped me with valuable skills and experience. I have a passion for tackling challenging problems and creating efficient software solutions. I stay up-to-date with the latest industry trends and am eager to contribute my expertise to innovative projects.

EXPERIENCE

2021-2022 **Full Stack Web Developer at NCAI -NED**

I've actively participated in full-stack web development, crafting responsive websites while also delving into Natural Language Processing (NLP) tasks, specifically specializing in sentiment analysis and text classification

EDUCATION

2019-2023 **NED University Of Engineering & Technology**

BE Software Engineer

2016-2019 **Government Degree Science & Commerce College - Malir Cantonment**

Intermediate HSC I & II (Intermediate)

PROJECTS

1) Income & Expenses Tracker App using MERN STACK

In this project, I build a full-stack web application using the MERN stack (MongoDB, Express, React, Node.js). The Income & Expenses Tracker App will allow users to manage their finances, record income and expenses, and view insightful reports.

2) Fullstack Blog Application

A user-friendly platform where users can create, edit, and delete blog posts. This project will cover essential aspects of web development, including user authentication and database interactions.

IZMA QAMAR

MERN STACK DEVELOPER / SOFTWARE ENGINEER

I am Izma Qamar, a proficient software engineer specializing in website development using the MERN stack. My journey in software engineering has given me a solid foundation in programming fundamentals and problem-solving skills. I am excited to embark on new challenges, collaborate with experienced professionals, and contribute my enthusiasm and determination to software engineering projects.

EXPERIENCE

MARCH 2023 - JUNE 2023

WordPress Developer and Web Developer Intern at Utech Services

Collaborated with the team to deliver effective web solutions, gaining hands-on experience in the field.

SEPTEMBER 2023 - OCTOBER 2023

IT intern at Karachi Development Authority (KDA)

Gained first-hand exposure to the practical operations of Karachi Development Authority, observing how software engineering principles are applied in realworld scenarios

PROJECTS

Organic Sphere: E-commerce Platform for Herbs Shopping

The "Organic Sphere" e-commerce platform showcases a user-friendly HTML/CSS UI, backed by efficient Microsoft SQL Server (MSSQL) integration. The PHP backend ensures smooth navigation and a seamless checkout experience for enhanced usability.

Agro-Chain: A Blockchain Revolutionized Integrated Supply Chain Model

For my final year design project, I developed AgroChain, a groundbreaking web application using the MERN stack. AgroChain leverages blockchain technology for transparency and security within the agricultural supply chain, reducing fraud risks. It features role-based access control through smart contracts and fosters trust with a peer-reviewed review mechanism, benefiting stakeholders throughout the supply chain.

Software-driven solution aims to revolutionize University Shuttle Services using cutting-edge Mobile and Web technologies.

• BookBazaar

Online Bookstore Developed with MERN Stack

• Restaurant Management System

Complete responsive website of a restaurant with all its details and contact information

LAIBA SOHAIL

SOFTWARE ENGINEER

Hi there, I'm Laiba Sohail. A web developer specialised in frontend development. A passionate individual that adheres problem solving and analytical skills to develop customised solutions on client requirements. Motivated to learn and grow in different dimensions of software engineering. A relentless optimist that believes there is no failure, only limitless efforts.

EXPERIENCE

JUL'23 - PRESENT

PoweApps Developer Intern at MazikGlobal

Developed Web and mobile based application on Microsoft Power Platform. Created Café Management Application using concept of canvas app, model driven app, CDS and Power Automate.

DEC'22 - APR'23

SOC Analyst Intern at Systems Limited

Managed SIEM solutions and learnt security and networking concepts

JUL'22 - OCT'22

KDA-IT Intern

Learnt a lot regarding the working of their Land Department, work environment of govt. sector, employee management system

MAY'22 - JUL'23

Web Developer Intern at Techno Desert

Created multiple websites using HTML5, CSS, js, PHP, MySQL.

MAY'22 - JUL'23

Frontend Developer At NCAI, NEDUET

Developed responsive as well as static web pages regarding interior design websites using HTML5, CSS3, JS. Also, learn the basic concepts of ReactJS.

MADIKHA HAMEED

SOFTWARE ENGINEER

I am a skilled software engineer with a strong foundation in coding and software development. My experience has equipped me with the expertise to tackle challenging problems and create efficient software solutions. I am dedicated to staying up-to-date with the latest industry trends and am eager to contribute my knowledge to innovative projects.

EXPERIENCE

2021-2022

Full Stack Web Developer at NCAI - NED

I've actively engaged in full-stack web development, crafting responsive websites that seamlessly blend aesthetics with functionality. My journey has also led me into Natural Language Processing (NLP). This expertise enables me to extract valuable insights from textual data, helping businesses understand and respond to customer. My commitment to staying updated in both web development and NLP drives my passion for creating innovative solutions.

MAHA JAVED

WEB DEVELOPER | SOFTWARE ENGINEER

As a recent Software Engineering graduate with expertise in frontend, API development, and databases, I'm eager to contribute effectively to forward-thinking teams while crafting exceptional web experiences.

EXPERIENCE

MAR 2022

**NED University Library Website
Updation**

Shift NED's Library System from paid subscription to free Google Books and Open Library API and their file system using JavaScript Ajax.

APR 2022 - JUNE
2022

**Php Developer Intern
Boossto Software**

Worked as an intern on an E-commerce website on Laravel

PROJECTS

Cloud3- A Secure Decentralized Cloud Storage

FYDP

**MySQL (Sequelize) | Node.js | React | Tailwind CSS |
IPFS | Blockchain**

A web based platform using which user can upload his documents in encrypted form on the IPFS. It gives user a complete control over his document and maintains his data privacy.

ProProgrammers Website

June - Aug 2021

HTML | CSS | Javascript | jQuery | PHP

A complete responsive online website deployed on azure for programmers to learn and practice programming through tutorials with quizzes and assignments, chat feature, notes keeping and library.

The Attire

Dec 2021 - Jan 2022

REACT | MATERIAL UI

A responsive E-commerce Website frontend which works properly with state management.

NoteWise

Mar - June 2022

MERN | BOOTSTRAP

A fully responsive notes keeping site

PROJECTS

• FYDP: Online Food Ordering App (For University Cafeterias)

Designed a mobile application using flutter as frontend and firebase as backend along with documentation and testing.

• Restaurant Management System

Build a desktop application using ASP.NET. Prepared a research paper, SRS, Design Doc and PowerPoint slides

• Online University Complaint Management System

Developed a website using Html, Css, Javascript, Bootstrap, Php. Prepared a project report consisting of framework activities. Linked the project with database and hosted on cloud.

MAIZAH KALEEM

BACKEND DEVELOPER

Hi there, I'm Maizah Kaleem. A Backend Developer specialized in webapp and API development for communication between services to bring a system to life! I have the problem solving skills to develop unique solutions to build the application that you desire.

EXPERIENCE

MAY '23 - PRESENT **Backend Python/Django Developer at RapidCompute - Cybernet**
Developing microservices using Django Rest Framework for the cloud platform provided to the users. Worked on pre-existing Python APIs using Postman for the product to optimize the performance of the system. Performed R&D for the proposed services to be implemented and provided to the user through the dashboard in the future.

OCT '22 - DEC '22 **Python API Development Internship at ByteCorp**
Learnt Python development and system development under mentorship. Developed APIs using Flask-RESTful and FastAPI with a MongoDB database.

MAY '22 - JULY '22 **Software QA Internship at Boossto**
Developed test cases for created webapp products of the company and tested the performance, load, stress, UI and working of the UI by whitebox testing.

MAR '22 - APR '22 **Software QA Internship at VinnCorp**
Learnt Software Quality Assurance using manual and automation testing. Developed test cases for multiple products of the company. Performed quality assurance through whitebox, blackbox and database testing for various company products

MUHAMMAD RAAMIZ SIDDIQUI

SOFTWARE ENGINEER

A recent Software Engineering graduate with expertise in various programming languages (Java, Python, JavaScript) and software development methodologies. Committed to continuous learning and innovation, aiming to leverage technical skills and problem-solving abilities to create cutting-edge software solutions and excel in engineering.

EXPERIENCE

AUG 22 - SEP 22

**Software Engineering Intern at
KDA - IT Civic Center**

Gained foundational software engineering skills as well as insights from websites and records related to land and property management systems.

OCT 22 - DEC 22

Java Intern at Supernet E Solutions

Obtained fundamental knowledge of software engineering practices, including Object Oriented Programming and core Java concepts.

EDUCATION

MUHAMMAD SAAD

APPLICATION SECURITY ENGINEER

I'm Muhammad Saad Akhtar, a Cyber Security enthusiast & Software Engineer with over 2 years of experience in Penetration Testing. Proficient in Vulnerability Assessment, I specialize in manual and automated web, mobile, and infrastructure security testing. I've participated in bug hunting on platforms like HackerOne, and I play CTF challenges on sites like HackTheBox and TryHackMe.

EXPERIENCE

AUG 21 - SEPT 21

Digital Forensics Intern @ NCCS

Performed practical mobile forensics and used different mechanisms for pass-code breaking of Android and iOS.

APR 22 - SEPT 22

Penetration Tester @ COMMTEL

Performed Penetration Test on various client associations. Tested against various web applications and infrastructure vulnerabilities along with detailed reporting.

OCT 22 - PRESENT

Application Security Engineer @ Systems Limited

With expertise in Web, Mobile & Infrastructure PenTesting, and API Security Assessment, contributing in enhancing security posture of various client organisations.

MUHAMMAD SAMEED ABBASI

SOFTWARE ENGINEER

Hi there, I'm Sameed. A Software Engineer, specializing in developing unique products and venturing into unknown domains! I have the necessary knowledge and mindset to extract ideas from the fabric of dreams and manifest them into the physical realm in the form of results producing products.

EXPERIENCE

- AUG 23 PRESENT** **Junior Application Consultant**
Logiciel Service
Working as an L3 support and developing in-house tools to increase productivity and efficiency of the system.
- MAR 22 JULY 22** **Software Development Intern**
OMEX Technologies
Developed a chat and stock ordering app using C# .NET(Desktop) and Java (Android). The clients use sockets for communication and send orders to company's server to buy and sell stocks.

PROJECTS

Targeted Fuel Pricing System

Python | OpenCV | ML | Flask | Azure

System Designer | Solution Architect | Backend Developer

Built an automated targeted fuel pricing system that uses Machine learning model to detect car category and return a corresponding subsidized fuel price in real time.

Optimized Distribution in Networks

Python

Simulation of a message distribution to achieve network saturation while maintaining origin untraceability. Investigated and discovered the optimum positions with multiple starting points.

Inventory Management System

C# .Net | Win Forms App | SQLServer | Azure Database

Business Analyst | Database Developer | .Net Developer

Developed an inventory management system for a spare parts vendor, with features including aggregated history log and efficient restock system.

PRO SKILLS

Data Visualization

JIRA

SQL

CPython

React Native

EXPERIENCE

JULY 2022 - OCT 2022

Application Support Intern at Engro Corp

- Interned at Engro Corp IT department where I gained experience working on the live ITSM project to revamp the JIRA platform.
- Assisted the team lead in creating a business requirement document and gathering information for the business inventory.
- Proficient in using JIRA for ticket resolution.
- Collaborated with the UX/UI design team to create clickable prototypes on Adobe XD for the JIRA revamp project.
- Learned to create dashboards on QlikView and filtering data, as part of the business intelligence team.

EDUCATION

- **2019-2023** **NED University**
Bachelor of Engineering in Software Engineering
- **2017-2019** **The City School**
University
A level in Pre engineering
- **2002 - 2016** **The City School**
Creative School
Pre K till O Level

PROJECTS

• **ELECTRONIC HEALTH RECORD COLLECTION APPLICATION AND DIABETES DIAGNOSIS (FYP)**

The project consisted of a mobile application that saves scanned images of medical reports. the backend consists of contour detection, NLP and OCR that extracts information from reports and saves in a database. The data is used to train machine learning classification algorithms for diabetes prediction.

SAAD ASHRAF

SOFTWARE ENGINEER

I'm passionate about exploring ways technology can provide practical solutions to everyday problems. I'm looking to connect with engineers and other professionals who are currently working in the field of technology.

EXPERIENCE

Sep' 2023 - Present

Full Stack Developer at Quantum Paradigm.

A fullstack MERN Developer whose responsibilities to create robust and user-friendly web applications, ensuring seamless functionality from the server to the client side.

June 2023 - Aug 2023

Application Development Intern at Folio3 Pakistan.

Worked on different technologies and made a full stack Car Rental Site using ReactJs, NodeJs, ExpressJs and MySQL.

Jan 2023 - May 2023

Frontend Developer at Upwork.com

Built and customize different projects of various clients on various technologies like ReactJs, React Native, Flutter and Python.

May 2022 - Sep 2022

Web Developer at Chaynz Tech

Worked as a Web developer using PHP, Javascript, ReactJs and MySQL.

EDUCATION

- **2019 - 2023 University** **NED University Of Engineering & Technology**
Bachelor of Software Engineering
- **2017 - 2019 College** **Govt. Dehli College, Karachi**
Intermediate Pre-Engineering.

PERSONAL PROJECTS

- **Eziqaat (Zakat Collection App) (FYDP)**
Build a robust and user-friendly Zakat Collection Mobile App and Website for an organization to automate and seamless the process of door-to-door zakat collection.
Tools: React Native, ReactJs, NodeJs, ExpressJs, MySQL, Swagger, Postman, Github, MS Azure and Vercel.
Github Repos:
Mobile App: <https://github.com/Fungineers/eziqaat-mobile>
Web App: <https://github.com/Fungineers/eziqaat-admin>
Backend: <https://github.com/Fungineers/eziqaat-backend>
- **Car Rental Website:**
Build an amazing car rental system to facilitate individuals to rent their cars on daily basis without any third party rental agencies.
Tools: ReactJs, NodeJs, ExpressJs and MySQL.
Github: <https://github.com/saadashraf123/car-rental-frontend>
- **Ecommerce Headphones Website:**
Build an ecommerce Headphone website in which user can buy different accessories like headphones, speakers etc using ReactJs, MUI, and Bootstrap.
Github: <https://github.com/saadashraf123/new-headphones-website>

You may find my other projects at the following github url.

SOFTWARE ENGINEER

Fresh software engineering graduate with strong problemsolving skills and a commitment to excellence, seeking a software engineer. Excited to use my knowledge to create new and effective software solutions. Collaborating with a dynamic team to design, develop, and deliver innovative software solutions that address real-world challenge to support vision of helping companies connect with their customers in fresh ways.

EXPERIENCE

MAY 2022 — JUL 2022

Software Developer, iTechnologi Group of Companies

Developed and maintained responsive and user-friendly web applications using, ensuring optimal user experience. Performed API handling and creation using postman and JSON, along with socket programming

MAR 2022 — APR 2022

Front-end Developer Internee Digitech Infra Associates

Create quality mockups and prototypes Worked as a Frontend Developer having knowledge in Html, CSS, JavaScript, jQuery and Bootstrap

MAY 2020 — JUNE 2020

QA Internee NED University Lab

Manual Testing, Automation Testing using Katalon Studio.

EDUCATION

2019 - 2023

University

NED University of Engineering and Technology

Software Engineering **CGPA:3.48**

2017 - 2019

College

Metropolis Intermediate College For Girls

Pre-Engineering

PROJECTS

• Blockchain based drug supply chain, Final Year Project

Designed and developed a secure and transparent blockchain based supply chain management system for medicines, verifying drug QR code through scanning and authenticating from ethereum network

• HR Management System

Design a architecture of HR management where HR had a access to add remove employee and fetch a detail of each employee.

• INTRUSION DETECTION SYSTEM FOR DOCKER SWARM ENVIRONMENT

The function was to analyzing network traffic, log files, and system events to identify potential threats and security breaches.

• User Entity Behavior Analytics UEBA

The tools used for this project were (Python – Machine Learning algorithms, TensorFlow). This project was based on the study of employee's behavior along few days, It included a huge data set which was trained using multi-model based system and the results were in the form of different deviations.

EXPERIENCE

09/2023 - PRESENT Software Engineer - Dream Beyond

- Working on a micro-service architecture based application.

01/2023 - 06/2023 Dot Net Developer - Logic Unit

- Designed complete databases for different services of SaaS based CMMS solutions.
- Built WebApis for different services. Integrated google calendar service to the application.
- Used Redis Caching service for permissions management.

02/2022 - 06/2022 Junior Python Developer - Bhramal Sys.

- Designed and implemented a time series-based Deep learning system that predicts the annual sale amount of a mart on different time spans.
- Deployed different machine learning systems as micro-services in a docker environment.
- Built dashboards for payroll management system and general ledger accounts

EDUCATION

2019 - 2023 Graduation

NED University of Engineering & Technology

Bachelor of Software Engineering
CGPA: 2.881

2017 - 2019 Intermediate

Adamjee Government Science College

Pre-Engineering - Karachi Board
Percentage: 86.82%

2015 - 2017 Matriculation

Buckingham Grammar School

Science - Karachi Board
Percentage: 89.18%

UMNA ARSHAD

SOFTWARE ENGINEER

Software Engineer devoted to gaining experience and boosting abilities via hands-on learning and growth. Proficient in website development settings and capable of producing clean code utilizing programming languages as well as creating dashboards using business intelligence tools. Team player who is well-organized and works well with others, with excellent communication and analytical skills. Dedicated to learning, growing, and succeeding.

UROOJ FATIMA

SOFTWARE ENGINEER

Recent software engineering graduate (Class of 2023) ranking 6th in the class while successfully completing FYDP in Unity3D. Passionate about development, brings a solid foundation in computer science and hands-on coding experience. Committed to continuous learning and problem-solving, ready to make a meaningful impact in the software engineering field.

EXPERIENCE

APRIL 2022 -
PRESENT

WordPress Developer - Octaxon

Developed WordPress websites while customizing them by using HTML and CSS. And collaborated remotely with team and clients.

APRIL 2022- MAY
2022

Software Intern - KDA-IT

Gained knowledge of technologies, server operations, employee payroll, and land management systems.

CERTIFICATIONS / ACHIEVEMENTS

PROJECT NETWORK - Python Data Structures
COURSERA

A short course based on a guided project.

IBM - COURSERA

Developing Back-End Apps with Node.js and Express.js

12-Hour course with hands-on experience of API and server-side development.

HACKERRANK

Problem-Solving (Basic)

Coding test based on Data Structures and Algorithms

EDUCATION

2019 - 2023

PRO SKILLS

SQL

Javascript, Python

Node Js, Express Js, React Js

React Native

Power BI

EXPERIENCE

**SEPTEMBER 2022 -
NOVEMBER 2022**

**Intern at Pakistan Council of
Scientific and Industrial Research
Laboratories, Karachi**

Achieved 97% accuracy with Retinal Vessel Segmentation, led a 90% team, and built an 85% Diabetic Retinopathy Classification model. Optimized efficiency from 60% to 80% through preprocessing, integrated into React Native, and developed MERN stack apps collaboratively.

**MARCH 2022 -
MAY 2022**

**Data Science Intern at ational
Center Of Cyber Security**

I mastered the art of handling extensive datasets, improving a ransomware detection system from 70% to 90% accuracy. I cleaned, visualized, and transformed datasets of up to 5000 malicious and benign applications. Additionally, I created client-focused product demos, contributed to two research papers, and automated anomaly detection, collaborating across disciplines to innovate solutions.

ZUNAIRA HASNAIN

PRODUCT ANALYST

An experienced Product Analyst passionate about improving user experiences through market research, collaboration, and data-driven insights. Proficient in roadmap development, user stories, and product documentation. Actively involved in testing and quality assurance. Adaptable and dedicated to contributing to overall product success.

EXPERIENCE

03/23- 08/23

Product & QA Analyst at Futafut Services

Conducted market research, identified user needs, assisted in developing product roadmaps, feature requirements, and user stories. Collaborated with cross-functional teams for timely feature delivery, analyzed product data, actively participated in testing, and improved user understanding through documentation.

08/22- 02/2023

Software Developer at Lambda Theta

Transitioned from intern to full-time role, dedicating six months to delivering impactful digital solutions. Proficient in web and mobile app development (React JS, SQL, Swift, Flutter) with a focus on exceeding user expectations through innovation.

05/2022 - 07/2022

Summer Intern at Folio3

During my internship at Folio3, I gained hands-on SDLC experience, from ideation to product deployment. Exposure to industry tools and a passion for computer science and innovation ignited my path toward software development excellence.

NIZAM ALI: A TALE OF FRIENDSHIP AND SELFLESSNESS

AUTHOR: MUHAMMAD MUZAMIL HUSSAIN, SE-19027

The world lost a gem of a person on February 17, 2023, when my dear friend Nizam Ali passed away. As I sit down to pen his biography, I am reminded of the countless memories we shared together during our time at the university. Our friendship was a beautiful journey that taught me the true essence of selflessness and compassion.

I still vividly remember the first day of our university, when Nizam, standing in our classroom, called out to me as if he were my senior. As fate would have it, we discovered that we hailed from nearby cities, and from that moment on, we became inseparable friends. We attended classes together, ate our meals together, and shared countless cups of tea, which we both had a fondness for.

Nizam's friendly nature was not limited to his close circle of friends; he was equally close to the security guards, gardeners, and other staff members of our university. He lived his life like a common man and had earned the respect and recognition of everyone around him during his three and a half years at the university. Nizam was a person who knew how to handle situations under pressure, and his calm demeanour was a source of inspiration for those around him. Although we had our fair share of arguments, like all friends do, we would always forgive and forget, and our friendship grew stronger with each passing day. I still remember the day when Nizam came to my house for his brother's heart operation. Unfortunately, his brother could not survive the surgery, and Nizam was deeply saddened by the loss. His brother's death had deeply affected him, but even in his grief, Nizam remained steadfast in his commitment to those around him.

One of Nizam's greatest passions was writing. He took great pride in his handwriting and would often write quotes and poetry on his friends' and classmates' handbooks during lectures. His teachers loved him, and he was always ready to lend a helping hand to his fellow students. Nizam had a unique approach to his studies that set him apart from many of his peers. While most students would stress out about deadlines and results, Nizam was always calm and composed. He never seemed to be concerned with grades or academic performance, but rather, he was more interested in his behaviour and how he carried himself. He believed that success was not just about academic achievement, but also about character and integrity. His focus on behaviour and character allowed him to live a life of purpose and meaning, and it was this philosophy that earned him respect and admiration from his friends and teachers alike. Nizam's unique approach to life and studies serves as an inspiring example for all of us to prioritize personal growth and character development above all else.

In conclusion, Nizam Ali was a person with a multitude of personality modes and aspects, each of which contributed to his unique character. His radiant smile, unwavering commitment to his friends and family, and selfless nature touched the lives of everyone he met. Although he may no longer be with us, his legacy of kindness and compassion lives on in the memories of those he touched. Rest in peace, my dear friend.
